

## **The Carmel Foundation Wednesday Programs August 2017**

Refreshments Served Immediately Following the Program

### **The Diversity and Habitats of Fishes (& Other Marine Organisms) in Monterey Bay**

Time: Wednesday, August 2, 2:30pm

Join Gregor Cailliet, Professor Emeritus in Ichthyology at Moss Landing Marine Laboratories, as he presents a talk about marine organisms, especially fishes, and their diversity and habitats, in Monterey Bay describing their environmental features and characterizing how this influences the flora and fauna that inhabit them.

### **Driverless Cars, Will Driverless Cars Have a Steering Wheel?**

Time: Wednesday, August 9, 2:30pm

Dr. Fuhs, retired Chief Scientist, U.S. Air Force Aero-propulsion Lab will do a presentation on Driverless Cars, (DC). He will cover the societal benefits (e.g. 90% reduction in traffic fatalities) costs of DC, when will DC become available, and how much will they cost the private person. What will be the impact on society – profound or minimal? Will GM or Ford become bankrupt? Can we trust our lives to a computer? A car without a steering wheel, really?! You will receive answers to these questions and more!!

### **Documentary: Steve McQueen: The Man & Le Mans**

Time: Wednesday, August 16, 2:30pm

Hollywood icon Steve McQueen was already an accomplished road racer when he agreed to star in the racing drama Le Mans. But creative differences and a flood of personal issues nearly doomed the project, as recounted in this intriguing documentary. Free popcorn and lemonade will be offered.
